Facial Recognition
Smart Door Lock

DDL709-FVP-7HWS

Smart capturing Face ID

Enjoy a touchless door opening experience

Start a touchless door opening experience with facial recognition smart door lock! By capturing the 3D facial features, Philips DDL709-FVP-7HWS allows you to unlock the door as you approach the doorway, which is fast and convenient!

3D facial recognition

With a dual camera that simulates human eye imaging, by obtaining 3D dynamic features on people's faces, it can effectively recognize people in photos, videos, and makeup. When you are 1 meter at the doorway, the AMS sensor* will wake up the facial recognition authentication. After successful authentication, the latch bolt will retract to achieve automatic unlocking, allowing you to access your home without extra actions.

Remote visible intercom

When the visitor presses the doorbell, a message will push to the mobile App instantly. You could start the intercom by tapping the message box to connect to the App and check the situation at the doorway. When the doorbell rings, the lock will automatically record the video, and even if it is not connected in time, you can view visitor information through historical messages.

Realtime's on Wi-Fi connection

The Philips DDL709-FVP-7HWS makes real-time online via the Wi-Fi connection. After binding the Philips EasyKey Plus App, you can view the lock access history, remotely send temporary PIN codes, and view the real-time situation at the door by clicking the video button.

* AMS sensor: An infrared proximity sensor, the sensing distance of DDL709-FVP-7HWS is set to be 1 meter (± 0.05 meter).

Smart motion tracking

Equipped with an ultrasonic sensor, the Philips DDL709-FVP-7HWS door viewer automatically performs motion tracking and sends notifications to the WeChat Mini Program when someone moves within 2 meters* of the front door. The facial recognition module also starts working when someone approaches the door from less than 1 meter away, providing quick authentication without any delays.

* Ultrasonic sensor: it is a proximity sensor that is enabled by default and has a sensing distance of 1 meter (tolerance of +0.05 meter) when activated by facial recognition wake-up.

4-inch IPS screen

With the 4-inch IPS screen on the indoor escutcheon, you can click the button on the screen to view the situation at the doorway. Re-clicking the button allows you to turn off the screen, which is convenient for the elderly and children. Additionally, you can adjust the screen's brightness and sleep mode timeouts via the mobile App.

Multiple alerting

Featured multiple alerts such as anti-dismantling, system locking, and low battery level, and abnormal bolt, Philips DDL709-FVP-7HWS instantly safeguards the family and reminds you of the lock status, making you feel assured and secure.

● Specifications

General Characteristics		Facial recognition	50	Dual verification	
Material	Aluminium alloy	Key tag	100	Alert	Anti-dismantling alert
Finishing	Baking varnish	Modes			
	Electroplating	Operation mode	Auto mode		Outside forced lock alert
Color	Copper	System unlock mode	General mode		Abnormal latch bolt alert
Handle	Push-pull handle		Dual verification mode		Low battery alert
	Mortise			Remote	Share temporary PIN code
Fingerprint sensor	Full auto mortise	Electrical Power			
	C-grade lock cylinder	System unlock mode	Li-Polymer battery		Check access records
Connection	Semiconductor	Battery life	3 months*	Emergency escape	Indoor fast opening mortise
Access Solution	Wi-Fi	Emergency charging	5V power bank	Update	OTA & update via rear interface
	Outdoor unlocking	Operation Environment			
	Fingerprint	Temperature	-20°C~+60°C	Indicator	Lock status indicator
	PIN code	Humidity	15%RH-93%RH		Mute status indicator
Indoor unlocking	Key tag	Installation Requirements			
	Facial recognition	Door thickness	38~60mm		System lock indicator
	Mechanical key		60~90mm		Outside forced lock indicator
Indoor unlocking	Rotary knob		90~120mm		Indoor infrared unlocking indicator
	Button	Door opening direction	Left-in/Left-out/ Right-in/Right-out		Open/Close infrared unlocking indicator
Capacity	Infrared sensor	Door type	Wooden/Copper/Security	Voice guide	Human voice guide
	User PIN code	Key Features			
	20 (included one-time PIN code)	Lock	Indoor deadlock		
	Master PIN code		System lock		
Master fingerprint	1	Safety	Hidden PIN code		
Fingerprint	99		Outside forced lock mode		

*3 months: The actual battery life will vary depending on the using scenarios.
